Copy 5 of 5

MEMORANDUM FOR: Chief, Materiel Staff, DPD

ATTENTION:

25X1A

SUBJECT: IDEALIST Fuel Supply

1. As you know, it has been the policy to keep a minimum supply of fuel at certain locations other than permanent Detachments to insure its availability when needed on short notice. Currently there is no procedure in effect which insures periodic checks of quantity, quality or conditions of storage for such fuel. The Detachments present no problem since our people monitor the fuel and we get routine  25X1A reports on quantity, etc. Also normal consumption insures a fresh supply which precludes deterioration from age.

2. It is requested you establish a requirement for maintaining a supply of Mil Spec 25524A fuel in the amount shown at the locations listed in para 3. below. Suggest a periodic quantity report be obtained (approximately every 30 days) and a routine quality test required approximately every 120 to 180 days. Information from such reports is to be furnished to the Control Center where project status charts will be maintained.

3. It is requested that Mil Spec 25524A fuel levels be established and maintained as follows:

<u>Location</u>	<u>Level</u>
NAS, Midway Island <span style="border: 1px solid black; display: inline-block; width: 450px; height: 1.2em; vertical-align: middle;"></span>	10,000 gals. 10,000 gals. 5,000 gals. 5,000 gals.
Incirlik AB, Adana, Turkey
